MANAGEMENT DISCUSSION AND ANALYSIS

1. Industry Overview

The global slowdown observed last year is still continuing and the situation still remains uncertain in various parts including Europe and USA. In India there were signs of slow recovery since September/October 2009. In the current year, the Indian market is expected to recover at a faster pace in view of the national policy of the Govt. of India to make substantial investment in various infrastructure projects and core sector industry.

2. Opportunity

As mentioned in the 'Industry Overview', the Government's decision to continue investment in the infrastructure projects and core sector industry will have a positive impact on the growth of the manufacturing sector. The induction of new products will also open new markets for your Company. Moreover, the investments in sugar industry, where your Company is very active, have been slow in the last few years. Substantial investment in this segment is expected during the current year.

3. Threats

The Company has been facing aggressive competition in the market due to the presence of suppliers from Asian countries, particularly from China.

Low cost manufacturers from the Asian countries continue to be a threat to the Indian industry. To meet this challenge, the Company has adopted a policy of upgrading the technology through in-house development and also by partnering with some leading global manufacturers. The rapid growth in the demand for Company's products requires the Company to expand the manufacturing infrastructure urgently. The Company has taken necessary steps to meet these challenges.

4. Risk & Concerns

Risk & Concerns identified by the Company as significant along with the frame work devised and mechanism developed for managing as well as mitigating those risks, are detailed below:-

- (a) Competition - As reported last year, increasing number of global players have started operating in India both on account of low costs of production as well as large domestic market. This has increased the competition and requires the Company to upgrade the technology and manufacturing capability to the corresponding international standard.
- (b) Costs - Sharp increase in the cost of input materials such as of steel, copper and related material over the preceding few months is a matter of serious concern. A major part of the business of the Company is supply of machinery for various projects which also have long lead time. Uncontrolled increase in the price of the input materials therefore may adversely affect the manufacturing cost and profit margin.
- (c) Exports - The Company exports a substantial volume to the license partners in Europe. Sharp devaluation of Euro, therefore, may have an unfavourable impact on this segment of business.
- (d) Quality - The Company has adopted new production methods to bring the quality level of its products to the international standards.
- (e) Receivables - To facilitate smooth recovery of sale proceeds, the Company has adopted various recovery measures and the debtor management system which have resulted in improvement in the liquidity position of the Company.
- (f) Financial - The comfortable liquidity position has helped the Company to meet the major part of its capital expenditure out of its internal generation. The surplus of retained earnings remaining after meeting the capital expenditure has been kept invested for short period in Fixed Maturity Plan (F.M.P.) and also in the Fixed Deposit Schemes (FDS) with various Banks.

MANAGEMENT DISCUSSION AND ANALYSIS (Contd.)

5. Internal Control System

The Company has an adequate system of Internal Control commensurate with its size and nature of operations to ensure that all assets are safeguarded, authorised and reported properly and correctly. The system also ensures that applicable statutes - the Code of Conduct of the Company and the corporate policies are duly complied with.

The Internal Control System is further supplemented by Internal Audit carried out by two independent firms of Chartered Accountants who submit their reports on half-yearly basis to the Management and the Audit Committee. The Audit Committee review the reports of the Internal Auditors and address significant issues raised by both the Internal Auditors and the Statutory Auditors. The Committee also follow up the implementation of the corrective actions suggested by the Auditors to ensure adequacy of the Internal Control System.

According to the management, in consultation with the actuary, it is not practical or feasible to actuarially value the Provident Fund liability in the absence of any guidance from Actuarial Society of India and also due to the fact that the rate of interest as notified by the Government can vary annually. Accordingly, the Company is currently not in a position to provide other related disclosures as required by the aforesaid AS-15 read with ASB guidance.
